## SUMMARY

I have built ~4 web apps (projects) that work great. Building these I used full power from my tech stack.

## MY PASSIONS

Become a strong engineer

Improve day by day

Explore new technologies

## EXPERIENCE

### First acquaintance with programming

Python

Simple CLI scripts, calculations

### Web acquaintance

HTML, CSS

I start building common websites

### Web intermediate

JavaScript

I learn JavaScript to make my websites live

### Back-end

PostgreSQL

Data is needed to be saved

### Front-end

React

To start to build a **UI** I should master a tool like React. With this it is way easier to control and maintain front side of an app

### Full-stack

Next.js

With all previous experience and **NEXT.JS** I can start designing and building **robust** web apps
